

THE SEIS HOMEPAGE: WHAT DOES IS SAY?

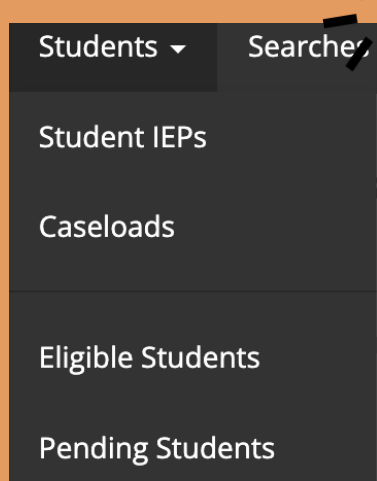

The SEIS home screen provides several different snap shots to provide quick access to what is happening in the world of special education. From current caseload status to upcoming IEP meetings and updates, the home screen is a great way to know what's happening.

CURRENT STATUS

This status snapshot will give you a quick overview of your current caseload.

Located towards the bottom of the home screen, you can easily see how many eligible students you have as well as how many are pending.

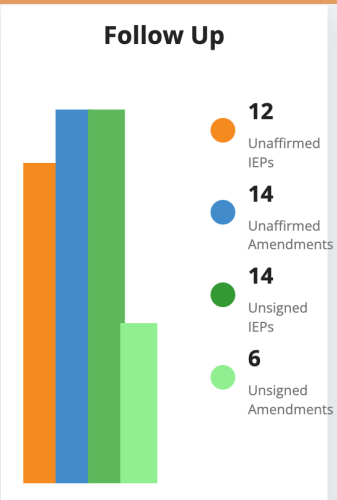

You can also find your detailed caseload from the top toolbar under the 'Students' dropdown.

From here you can see specific information about who is eligible and who is pending.

TO DO LIST

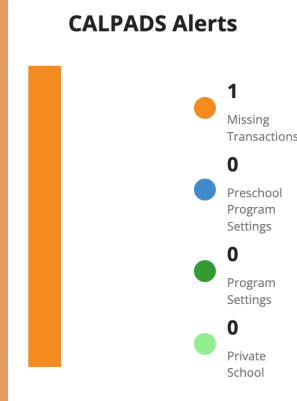

Now that the meeting has been held, the IEP needs to be affirmed at attested. The 'Follow Up' screen below tells you how many Unaffirmed IEPs, Unaffirmed Amendments, and Unsigned IEPs you currently have.

POST MEETING: CALPADS ALERTS AND AFFIRM/ATTEST

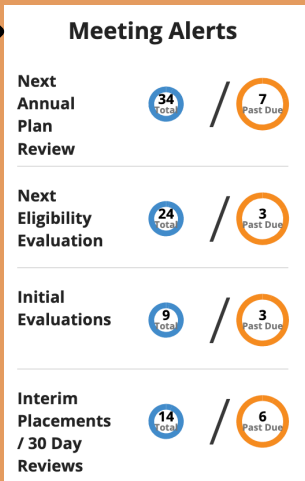

IEP finalization may create some errors that need attention. The CALPADS Alerts graphic will let you know how many alerts you have and in what areas.

WHAT'S COMING UP?

The SEIS homepage also has information about upcoming caseload activity. The Meeting Alerts snapshot shows which IEPs are coming up (plan reviews, eligibility reviews, initials, and 30 day placements). This snapshot also shows the breakdown of how many IEPs are on time and how many are currently overdue. **NOTE:** All unaffirmed IEPs will show as overdue if they are not affirmed within their timeline window.

NEWS AND UPDATES

The SEIS News snapshot will have any new information on trainings, updates to SEIS, and any planned maintenance shutdowns. The Local News snapshot will have any announcements or updates from the SELPA office. This may include reporting timelines, error checks, or anything that is specific to our local schools.
